

DirectAdmin Suite

Automate Infrastructure. Eliminate Delays.

 Web + CLI  AMW Mining & Allied Services  amwmining.in

DirectAdmin Suite automates server infrastructure management — DNS configuration, email provisioning, SSL deployment, and hosting panel administration through a unified API-driven dashboard.

The Challenge

Managing multiple hosting servers, DNS records, SSL certificates, and email accounts manually is time-consuming, error-prone, and creates security vulnerabilities.

Our Solution

DirectAdmin Suite centralizes and automates all server management tasks through secure API integration.

Key Features

Purpose-built capabilities for the mining industry

DNS Management

Automated DNS record creation, modification, and propagation monitoring across all domains.

Email Provisioning

One-click email account creation, alias management, forwarding rules, and mailbox migration.

SSL Deployment

Automated SSL certificate issuance, renewal, and deployment with premium CA support.

API Automation

RESTful API for custom integrations, bulk operations, and workflow automation.

Health Monitoring

Server uptime monitoring, resource usage alerts, and automated failover configuration.

Backup Management

Scheduled backups, incremental snapshots, and one-click restoration with cross-server transfer.

Impact & Results

Measurable outcomes from real mining operations

90%

Reduction in manual tasks

99.9%

SSL deployment uptime

5min

Server setup time

Automated

Certificate renewal

Ideal For

- ✓ Web hosting companies
- ✓ IT departments managing mining portals
- ✓ Multi-site hosting
- ✓ DevOps teams
