

MineOps Desktop

Command Your Mine from One Screen

 Desktop Application  AMW Mining & Allied Services  amwmining.in

MineOps Desktop is the enterprise-grade operations control center for mining companies. It consolidates production tracking, dispatch management, inventory control, and MIS reporting into one powerful desktop application.

The Challenge

Mining operations juggle spreadsheets, paper logs, multiple software tools, and manual data consolidation — leading to delayed decisions, data silos, and operational blind spots.

Our Solution

MineOps Desktop unifies every operational metric into one real-time command center, accessible from any mine office.

Key Features

Purpose-built capabilities for the mining industry

Production Tracking

Real-time production dashboards by face, bench, shift, and unit — with target vs. actual analysis.

Dispatch Management

Fleet assignment, route tracking, cycle time analysis, and load-to-dump optimization.

Inventory Control

Explosives inventory, fuel tracking, consumables management, and automatic reorder alerts.

MIS Reporting

Automated daily, weekly, and monthly MIS reports with customizable templates and email distribution.

Shift Handover

Digital shift handover logs with action items, pending issues, and management escalation.

Role-Based Access

Multi-user access with role-based permissions — from mine manager to DGMS compliance officer.

Impact & Results

Measurable outcomes from real mining operations

50%

Faster decision-making

30%

Production increase

Zero

Data silos

Instant

MIS generation

Ideal For

- ✓ Large opencast mines
- ✓ Underground coal operations
- ✓ Multi-unit mining complexes
- ✓ Mine management offices
