

MineSafety 365

Your Mine. Always Safe.

 Android + Web  AMW Mining & Allied Services  amwmining.in

MineSafety 365 is a comprehensive workforce safety monitoring platform designed for the mining industry. It provides real-time GPS tracking, SOS emergency alerts, shift management, and incident reporting.

The Challenge

Mining operations struggle with real-time worker visibility, delayed emergency response, manual shift logs, and paper-based incident reporting.

Our Solution

MineSafety 365 connects every worker, every shift, every incident — in real time, from anywhere.

Key Features

Purpose-built capabilities for the mining industry

Real-Time GPS Tracking

Live location of every worker on-site with geofence alerts for restricted zones and blast areas.

SOS Emergency Alerts

One-tap SOS with automatic location broadcast, escalation chains, and emergency protocol activation.

Shift Management

Digital shift handovers, attendance tracking, overtime logging, and crew assignment optimization.

Incident Reporting

Structured incident forms with photo/video evidence, root cause analysis templates, and auto-escalation.

Safety Dashboard

Centralized web dashboard with safety KPIs, incident trends, near-miss analytics, and compliance scores.

Certification Tracking

Track competency certificates, medical fitness records, and training expiry dates with auto-renewal alerts.

Impact & Results

Measurable outcomes from real mining operations

85%

Faster emergency response

40%

Reduction in incidents

100%

Shift coverage tracking

Real-time

Worker visibility

Ideal For

- ✓ Underground coal mines
- ✓ Open-cast operations
- ✓ Contractor workforce management
- ✓ Multi-site mining companies
